Professional Summary

Aspiring AI/ML Professional with a strong academic foundation in Computer Science, specializing in Artificial Intelligence and Machine Learning (AIML) with a minor in Fintech. Awarded a college scholarship for outstanding academic performance (9.6 CGPA). Proven ability to develop robust, scalable solutions, demonstrated by a successful AI-powered document processing and translation system during an internship. Eager to contribute technical skills (Java, C, Python) and passion for Generative AI and data-driven methods to a forward-thinking organization.

Education

RV University, Bengaluru

B.Tech. (Hons.) in Computer Science and Engineering (AI & ML Major, Fintech Minor)

Expected Graduation: 2028

Academic Scholarship Recipient

CGPA: 9.6/10.0 (First Year Performance)

EuroSchool, HSR Layout

ISC (12th Boards - PCMC)

94.75% (School Third Topper)

Gnan Srishti School of Excellence

ICSE (10th Boards)

97.6% (School Second Topper)

Technical Skills

Programming Languages: Java, C, Python, SQL, HTML, CSS

AI/ML Tools: Hugging Face, Streamlit, Sambanova AI, Git/GitHub

Concepts: Artificial Intelligence, Machine Learning, Database Management Systems (DBMS), Frontend Development

Certifications: IBM AI Developer (Coursera)

Internship and Project Experience

AI/ML Intern at Broadrange AI (February 2025 – August 2025)

- Spearheaded the development of a comprehensive AI solution for document processing and translation using Streamlit and Sambanova AI.
- Engineered core functionalities including text/PDF content extraction, multi-language translation, and document summarization leveraging Hugging Face models.
- Developed an integrated conversational chatbot and speech-to-speech translation feature to enhance user accessibility and interaction.
- Implemented a resource tracking module to accurately monitor token usage and calculate real-time translation/summarization costs in various currencies, ensuring cost-efficiency.

Project: BeatSavior – Heart Attack Management System

- Designed and implemented a Database Management System (DBMS) solution for efficient patient data organization and heart attack management.
- Modeled and structured database schema using MySQL to optimize retrieval of critical patient history data.

Awards & Participation / Co-Curricular Activities

Academic and Technical Achievements

- Academic Scholarship Recipient: Awarded college scholarship for outstanding first-year performance (9.6 CGPA).
- IBM AI Developer Course completion (Coursera).

Leadership and Co-Curricular Activities

- Demonstrated strong leadership, communication, and execution skills through academic group projects and organizing university tech events.
- Represented school in Basketball and Throwball competitions, winning interschool championships.
- HAL Aerothon 2025 conducted in PES University.
- RVITM - Hacker Ring in association with Oxday Hackathon 2025.
- Member of CodeVerse Leetcode Community GDG, RVU.
